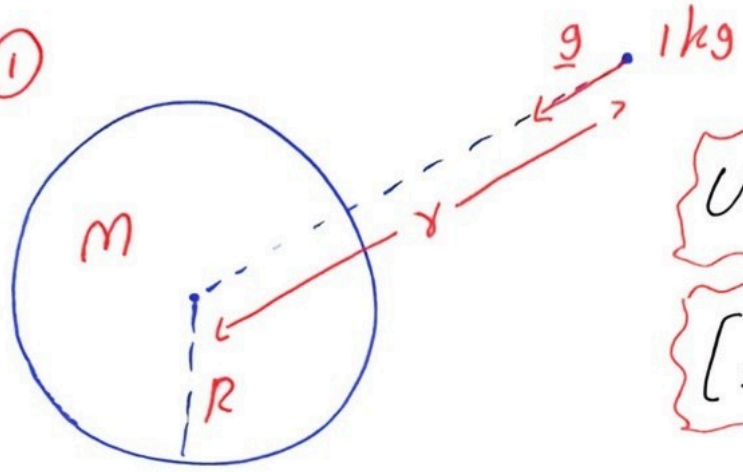
# Gravitatial Field

## ⇒ Gravitational field intensity

①



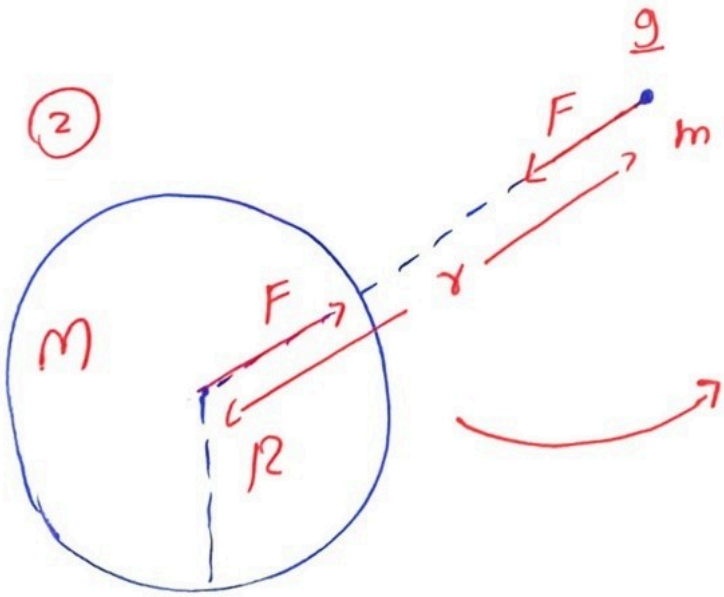
Units → $Nkg^{-1}$

$[\underline{g}] \rightarrow LT^{-2}$

→ Vector quantity

$$F = m\underline{g}$$

②

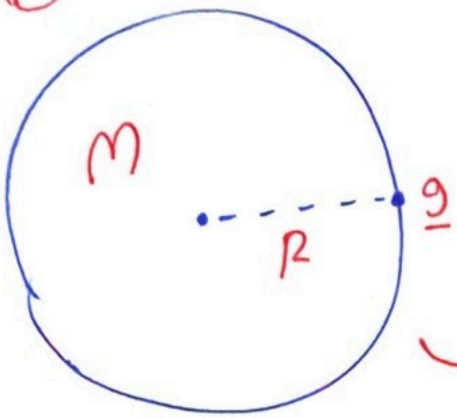


$$F = m\underline{g}$$

$$\Downarrow$$

$$\underline{g} = \frac{GM}{r^2}$$

(3)

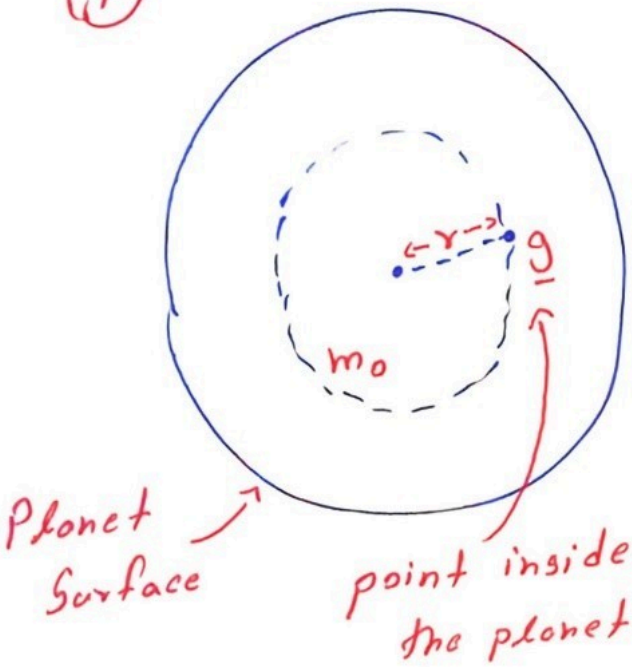


$$\underline{g} = \frac{GM}{R^2}$$

$$\Downarrow$$

$$gR^2 = GM$$

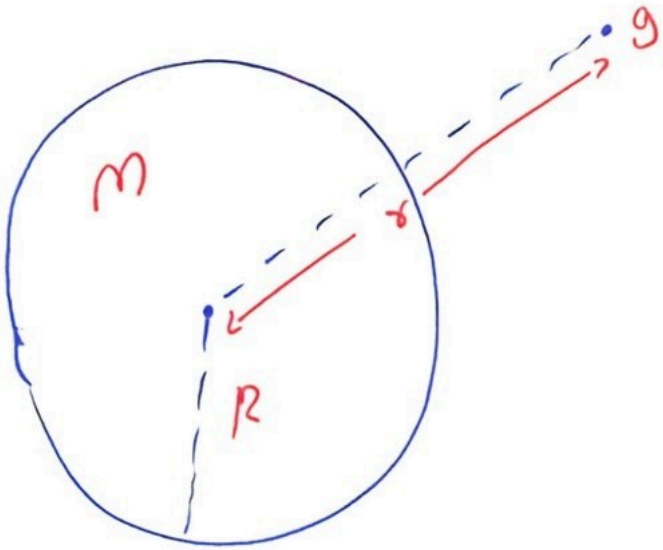
(4)



$$g \propto r$$

'g' directly propotional to 'r'

(5)



$$g = \frac{GM}{r^2}$$

$$\Downarrow$$

$$g \propto \frac{1}{r^2}$$
